

PURE WATER DISCOVERY!

When water goes through a distiller, filter, reverse osmosis, ozonator, alkalizer, ionizer, one time (even 10 times) it's not enough to produce water that stops the spread of the diseases of former users or kill pathogenic bacteria! We process water 100's of times/gal...NOT ONCE!! Look at the chart, typical success stories and why regulators finally allowed the results of this extraordinary discovery. (Results can be measured on the skin using doppler ultrasound)!!

A TYPICAL "WATER SCAM" AD:

"100% PURE WATER! WATER SCAMS EXPOSED...FREE REPORT!"

While they SCAM THOUSANDS OF CONSUMERS by selling water distillers recalled by the Federal Product Safety Commission (with no tests or warning showing they can't make "pure" water using lab standards and using plastic collection jugs that leach plasticizers 55 times faster when the water is hot) the water becomes a poison! How about common sense? The FDA never approved taking drugs by the handful either! Consumers were warned about plastic baby bottle dangers and the 57 drugs found in Philadelphia drinking water with 41 million people affected by drinking a drug "cocktail" (AP 3/10/08) along with users disease markers flushed down toilets into our drinking water!

After 36 years in business, we have heard from thousands of families that have been devastated by distilling polluted well water because they believed the "100% Pure" ads! They are breaking State and Federal Laws on Deception: FTC Policy Statement 10/14/83. Also FTC Order 3220!

WE HAVE THE ONLY PRODUCT ON THE MARKET THAT CAN MAKE PURE WATER USING LAB STANDARDS!!

Compare! Stop Disease!	Molecular Bond Angle	Does it Stop Disease?
Our Med Water	114°	Yes
Hydrogen Peroxide	111°	Yes
Ordinary Water	104°	No
Distilled Water	101°	No

When we started in business, the largest selling home distiller made water 9 times purer than the tap water. By starting and stopping the boiling to lower the steam velocity and pollutant "carryover", 5 of our machines were tested by York Labs down to "less than" 0.07 ppm...827

times purer (on our website)! Pure water is 0.1 ppm and the best Corning lab still goes down to 0.14 ppm. This is phenomenal for such a small home machine! COMPETITORS WILL MAKE EVERY CLAIM IMAGINABLE BUT THEY WON'T GIVE YOU THIS TEST!! USE COMMON SENSE! Realize that if water goes through a product one time (even 10 times) THE "PURIFIED" WATER WILL SPREAD DISEASE!! OUR WATER WON'T! (Dole Banana, human waste lagoons and thousands of wells with only one treatment!) On the contrary, water goes through our machines 100's of times/gallon to produce these results and they produce "light" distilled or "light" tap water.

The largest food distributor (\$20 billion/yr) spent a year and over one million dollars checking out our water! An article in *The Washington Post* as far back as 1/27/92 states: "This 'light' water will cure anything!" 10,000 people/day went to a wealthy Mexican land owner to obtain our water, some waiting in line for 2 1/2 days! The article describes our "light" water and worldwide patents:

The Washington Post as far back as 1/27/92 states:
"10,000 people/day going to Tlacote, Mexico said: This water cures anything!"

UCLA M.D.:

"Nothing comes even close in getting blood to the extremities!"

"The curative power results from the 'movements' of water between two metal tanks."

Like alcohol (without the side effects) our "light" water produces great blood flow and it's easy to prove why nothing else can produce such amazing results that can be measured, in a non-invasive way, using doppler ultrasonography! UCLA Medical School M.D.: "We have tested every water product available and nothing comes even close to yours in getting blood (94% water) to the

extremities!" Products For Pain ("Put It Where It Hurts") were allowed by regulators because the published results are measured on the skin, i.e. like the doppler effect where the ability of blood to go through a membrane into the cells can be measured on the skin. Take a cloth, soak it in "light" water and put it on the problem area or as a typical example: "I am diabetic and my foot turned black. I soaked my foot in your water while I watched TV. The skin turned rosy pink! Thank God for your discovery!" M.D. (After a man regrew the tip of his finger): "If I hadn't seen this, I wouldn't believe it!" When the inventor was down in Exuma recently somebody said: "How old do you think that man is?" They agreed between 38 and 48. He's 79. It works!

If you buy an E5 machine, you are invited to a party at the Shohola property where you can meet people with similar success stories!

Politics aside, most of our profits go to this mountain property where our camping facilities support the Boy Scouts, Girl Scouts and disadvantaged youngsters. After 36 years in business and over 200,000 users, the results are well documented!
